

CROWNE PLAZA

■ DUBAI, UAE

Infinity MEP+S was team engaged to provide Acoustic and Fire & Life Safety Strategies for the upgrade and refurbishment of this 968,256 SF mixed-use development In Dubai. The Crowne Plaza includes 455 Hotel Rooms, a furnished apartment block of 213 Units, a two-story Commercial Center and an office tower with partial underground parking space for 600 vehicles. The luxury apartment units are design for one tenant per floor. The twin, mid rise building will contain penthouses, a pool and pool deck, and a bar/club on the one of the tower's top floors.

This project, located on Sheikh Zayed Road in Dubai, has inspired numerous other developments in its vicinity and was instrumental in transforming this area into Dubai's business district.
